

I am a subscriber to XM and DirectTV. This attack on XM is just like the attack on DirectTV where they tried to limit the choices of consumers. I should be able to get local information from whatever source I want. If broadcasters locally do not appeal to me then they should keep up with the times and change to make themselves more appealing to me, not create a lawsuit to restrict my choices so that they get paid even if they do not change. Please do not limit my choices and give companies income even though they do not contribute to my freedom of choice.
